

UNIQUE SPONSORSHIP OPPORTUNITIES

Maker Faire Milwaukee is an important opportunity to associate your organization with the global Maker Movement, and our growing local community of Makers. For details, contact us at sponsors@makerfairemilwaukee.com

EDUCATION AND WORKFORCE DEVELOPMENT OPPORTUNITIES

FIELD TRIP FRIDAY

Programs for K-12 students from high-needs neighborhoods include hands-on workshops and demonstrations with Faire exhibitors, a behind-the-scenes tour of the Faire and opportunities to talk with makers.

INDUSTRY, CAREER & COLLEGE EXCHANGE

is an opportunity for students, young talents, job-seekers and makers to explore career paths, education and work opportunities related to Making and the critical STEAM fields.

MAKING IN EDUCATION CONFERENCE

Classroom teachers, administrators and others in the education field are invited to the Faire's 3rd annual conference, designed to share information, skills and strategies to encourage project-based and STEAM learning.

2018 SPECTACLES AND SPECIAL EVENTS

HEAVY META

This fire-breathing dragon, with interactive sound, mechanical and light components, will visit the Faire from Toronto, Canada. With high profile (and high heat) shows scheduled throughout the event, it's a pretty darn great sponsorship opportunity for those looking to brand a signature Maker Faire experience.

RUNWAY FASHION AND COSPLAY SHOW

A runway show that will feature wearable technology, unusual techniques and unexpected materials, as well as an open runway opportunity for cosplay exhibitors, who are an important element of the Maker Movement. Shows are scheduled for Saturday & Sunday at the Faire.

POWER RACING SERIES

Attracting entries from around the country, Milwaukee's Power Racing event is part of a national schedule of weekend races that feature kids' electric ride-on vehicles that have been modified by teams for \$500 or less. Teams race for points and trophies – but mostly for fun – and they share information about their builds, tools and technology with competitors and adoring fans.

SIGNATURE MAKER FAIRE ACTIVITIES AND WORKSHOPS

SWAP-O-RAMA-RAMA

A do-it-yourself workshop area with sewing equipment, other tools and supplies and knowledgeable and skilled volunteers who can provide instruction about sewing and creative reuse of clothing and other materials.

DESIGN & BUILD DERBY

The Design & Build Derby is a miniature car building and racing competition. Experimenting with momentum, friction and gravity, participants can race their car on a series of ramps and adjust their design to increase car speed.

LEARN TO SOLDER

Makers of all ages can come to the Faire to learn or build on their soldering skills. Participants will receive all the materials and be provided the tools needed to create a fun project.
